Standard Website Design

Marketing for the Web - Once a website has been developed, its success is measured by the number of visitors it generates. Bright House Solutions is experienced at creating and maintaining a good position on search engines.

Meta Tags by themselves are no longer as effective as they use to be and have very little effect on where your website comes up in searches done on Google. It can take between 3 to 9 months for a non-paid SEO campaign to start showing results. The trick is to be consistent. You need to add content to your website on a regular basis, and the content you add must have the keywords and descriptions people search for on Google when trying to find your business. You need to create good quality backlinks to your website. Please ask the sales representative for more information on backlinks. And last but not least, it is very important for SEO to have a mobile friendly website. And all of our websites are mobile friendly. Please note that the setup cost of our quotes does not include Bright House Solutions adding content to your website on a regular basis or creating backlinks. And this quote does include basic SEO. Please chat to us about **additional SEO options** to help your site rank on Google.

We also assist many companies in setting up Google adword campaigns and Facebook marketing campaigns as well. Websites **do not automatically generate traffic and leads by themselves** so a Google or Facebook ad campaign is very important. Please speak to our sale rep for more information and costs on the paid SEO option.

More than 1800 design options to choose from:

<https://elements.envato.com/wordpress/template-kits/compatible-with-elementor-pro>

We customize your chosen design option according to your requirements.

Our portfolio: <https://www.originalwebsitedesign.co.za/portfolio/>

Our website design principles:

<https://originalwebsitedesign.co.za/website-design/>

We purchase 20 images from <https://elements.envato.com/photos> which you are welcome to select. We use these images as part of the design and part of the content.

Pages: All information and additional pictures to be supplied by the client.

Your contact details will be displayed at the bottom of every page. Hero sections, engaging header images, interactive galleries, tabbed content, and dynamic content blocks are all included in this quote. These elements can be showcased on select pages or across your entire website. The design and setup cost includes 1 to 5 additional web pages, such as Home, About Us, Services, Contact Us & etc, ensuring a well-structured and visually appealing website.

The admin section of the website will give an administrator the ability to **update any part of the website** through a user friendly interface.

This quote **includes CMS training** to show an administrator how to add, edit and delete pages on the new website.

The content management system we use to create our clients website is called **Wordpress**. It is the **leading CMS worldwide** and has a seemingly endless amounts of prebuilt plugins we can use that are cost effective and easy to setup. This allows us to cater for your unique requirements in an affordable way.

Monthly hosting includes: hosting of your website and emails (Unlimited email accounts), unlimited disk space and bandwidth for your website and email accounts. And 1 hours maintenance every month.
